Brief summary of the event:

As daily wet waste is produced from kitchen and dry waste is generated in the herbal garden due to fallen leaves, in order to proper utilisation of the huge waste our department of dravyaguna had arranged a workshop on waste management on 28/03/2023 10-1pm.

Mrs Priya Bhide madam and Mrs Bhawe madam were invited to first give a lecture on household waste management and after that they gave demonstration of various instruments or models used in different quantity of kitchen waste. Also various types of natural cultures used for conversion of degradable waste into organic manure which we can use it again for the nurture of plants. Thus madam explained recycling process of nature.

Madam also gave demonstrations of how we can use non-degradable waste into useful models. Mrs Bhawe madam had explained how we can generate biogas energy from wet waste of kitchen and showed model of Biogas unit.

In this way each and every particle of dry and wet waste can be reprocessed to make sustainable nature friendly utilization for human beings.

Utility-The workshop was very much useful for non-teaching staff & teachers to sensitise sustainable nature friendly living with utilising waste which is created by us only.
