Brief summary of the event-

The purpose of the educational visit was to observe processing of milk and milk products. Prior official permission of visit was taken. Primary information of plant was given by short video presentation. Then students were divided into two groups and led to the visit.

Phases of Milk Process

1. Milk is collected in the collection center in villages where villagers come and sell their milk
2. Primary checking of milk is done for the quality and added to milk holding tanks.
3. It is then transferred through pipelines to boiler unit where milk is boiled to kill germs and to last longer, known as **pasteurization**
4. **Boiler room** - Pasteurization refers to process where every particle of milk is heated up to 63°C for 30 minutes or 72°C for 15 seconds in well-equipped machines

5. **Refrigeration Department** - After Pasteurization milk is cooled down to 5°C or below
6. **Quality control** - This dept uses random sampling method for testing samples. They usually check for pH, fat content, acidity, water content, saturation levels, lactic acid content
7. Later, the milk is stored in specially designed storage tanks thereafter it is ready for further processing and packaging. This milk is utilized in the production of various products such as butter, ghee, flavored milk, ice cream etc.
8. **Packaging unit** - The milk and various products are packaged in a very hygienic condition.
9. All these products are available at Katraj owned parlors at various locations in Pune city and through appointed distributors and retailing circuits
10. After visiting all phases, queries of students were solved by instructors. The visit was concluded with satisfaction.

Brief summary of the Event:

Agadtantra department had organized visit to Snake Park, Katraj of UG & PG students on 4th July 2023 on 10 am. Snake bite diagnosis and management is an important topic in the syllabus of Agadtantra of both UG and PG curriculum. To help students to identify snakes, this visit was organized. As many times patient and their relatives bring dead snake or their photos. Identification of snakes thus helps in clinical practice. Many venomous snakes were displayed in Snake Park like cobra, krait, Russell's viper and bamboo pit viper. Other non-venomous snakes like python, rat snake, Trinket were also there. Mr. Rajan Shirke also gave his experience based valuable guidance of "on field management" to the student.
