Pharmacognostical Aspects of medicinal plants

Introduction

According to WHO 80% population depends upon traditional medicines which are majority plant sources. Due to lack of knowledge about its uses & identification most of the plants are included in endangered list day by day. As medicinal plants play important role in primary health care, Ayurved undergraduate doctors must know the characters & common useful plants with differential morphology of their useful parts. This is very important as pharmacognocny in the first step to ensure pharmacology or to know Pharmacotherapeutics in herbal healthcare sector.

Aims & objectives -

1. To identify medicinal plants with the help of Taxonomy
2. To increase / to develop ability of observation of plant parts & observing nature to see similarities in both nature & dravya.
3. To identify medicinal plants in context of Ayurved and in terms of Nama, Rupa, Prakriti and Swabhava of dravya.

Course Outcome -

1. After completing this course student will understand peculiar morphological key characters of some common medicinal plants.
2. They will be able to identify substitutes & adulterants of used instead of original plant parts.

Introduction:

Medical profession is considered as one of the noble profession in the world. Service to humanity and mankind is an integrated part of it. But nowadays there is increase in litigation against doctors. One of the culprit is inclusion of healthcare sector in the compass of consumer protection act. Also there is an increased awareness among the patients regarding medical knowledge by using internet and search engines like google.

We are taught how to save patients in all other subjects of medical curriculum. Our protection is also of utmost importance. Medical jurisprudence helps us to protect ourselves from legal issues. That's why we have prepared this course. It will guide students to safeguard themselves in their clinical practice.

*"Wherever doctor cannot do GOOD..
He must be kept from doing harm..."
Hippocrates*

Aims and objectives:

- 1) To increase awareness among students about medico legal situations which may arise in clinical practice.
- 2) To identify medico legal problems which can arise in clinical practice.
- 3) To guide them, how to respond if such situation arises.

Course outcome:

- 1) After completing this course student will understand medico legal rules and laws associated with day to day practice
- 2) They will be able to prevent medical negligence and medical malpractice litigations

Modules

Module 1	Medical ethics
Module 2	Rights and duties of RMP and patients
Module 3	Medical Confidentiality
Module 4	Medico legal documentations
Module 5	Consent
Module 6	Laws governing medical practice
Module 7	Medical negligence
Module 8	Consumer protection act
Module 9	Certificate writing

Eligibility: Third Professional Year BAMS

Duration: 17th May 2021 to 4th June 2021 daily

INTRODUCTION

Pharmaceuticals is one of the important part of medical profession. Service to humanity and mankind is an integrated part of it. Now a days there is less number of Ayurvedic herbo- mineral preparations with some misconceptions also.

For creating awareness of herbo- mineral preparations mentioned in Ayurveda, our department framed value added course. For this course, our students can join without any fees.

We are taught how to save patients in all other subjects of medical curriculum. By self preparation of Ayurvedic medicines, we can treat a lot of chronic disorders. There are thousands of Ayurvedic preparations mentioned in classics of Ayurveda. We are focusing on the preparations, which can be used in day to day practice. That's why we have prepared this course. It will guide students to prepare their own quality medicines in their clinical practice.

AIM & OBJECTIVES

- 1) To increase awareness among students about herbo- mineral with herbo- mineral preparations. Which are useful in clinical practice
- 2) To create quality awareness in preparation.
- 3) Raw material, Process and finished product, packing, labeling related awareness has to be created.

COURSE OUTCOME

- 1) After completing this course student will understand the Ayurvedic medicinal preparations which can be used in day to day practice.
- 2) They will be able to prepare quality medicines.
- 3) By these quality medicine, they can treat and save the patients.
