Student Support, Career Guidance and Placement Cell

The Student Support, Career Guidance and Placement Cell helps students make informed decisions about their academic and professional journeys after BAMS. Through guest lectures, career counselling programmes, and interactive sessions, the Cell creates awareness about diverse career opportunities beyond the conventional paths of MD/MS, clinical practice, and hospital services. Students are introduced to emerging areas and alternative career avenues, enabling them to explore options based on their interests and abilities. The Cell also facilitates placement opportunities by coordinating with organisations that approach the college for recruitment and conducting placement drives for eligible students.
